

Senior Software Engineer (.NET)

GreenLine Systems™ is a privately held, rapidly growing company headquartered in Washington, DC. GreenLine delivers software and services that allow supply chain participants to identify, evaluate and respond to operational and financial risks associated with the movement of goods across borders. The GreenLine platform creates **value, security and trust** by introducing collaborative Supply Chain Risk Management to form **Trusted Trading Partner Networks™**.

GreenLine Systems is currently engaged on several projects involving border security, anti-terrorism and counter-proliferation missions. To support those projects, we are looking to expand our DC presence. Currently, we are seeking a motivated, hard-working, dynamic **Senior Software Engineer (.NET)**, to join our DC team and be a key player in the successful delivery of these projects.

Description:

We are seeking senior level software engineers to design, develop, and test web-based applications using IIS, ASP.NET, C#, SQL Server, MSMQ, XML and related development tools and products. We are looking for talented, self-motivated individuals that want to play a key role in enhancing our supply chain risk management platform.

Key Responsibilities:

- Design, implement, and unit test application / system components using the .NET Framework, IIS, ASP.NET, C#, MSMQ and SQL Server.
- Participate in product requirement and design reviews with product managers and other engineers.
- Develop time-estimates for work assignments.
- Develop technical documentation, and support the QA, release, and production support processes.
- Work closely with the support teams to expeditiously resolve issues.
- Research and prototype new technologies for deployment within the GreenLine platform.

Requirements, Knowledge and Skills:

- Minimum requirements include Bachelor's Degree in Computer Science or equivalent experience.
- 7+ years experience and successful track record in the design, development, and testing of web-based applications.
- 2 years experience developing web applications using C# and ASP.NET
- 4-7 years experience developing web applications using IIS, ASP, XML/XSLT, and SQL Server.
- Knowledge/Languages: IIS, ASP.NET, C#, .NET Framework, XML/XSLT, HTML, SQL Server, MSMQ.
- Experience with EDI/XML mapping transformation tools like BizTalk is a plus.
- Experience with Oracle database and application server is a plus.
- Ability to shift focus, adapt to changing priorities, and maintain patience in high-pressure situations.
- Excellent communication and team-work skills.
- Background in supply chain and or logistics or risk management solutions a plus.

US Citizenship is required for all GreenLine Systems positions. Applicants selected may be subject to a United States Government background investigation and required to meet security clearance requirements for US Customs and Border Protection.

GreenLine Systems, Inc, does not accept unsolicited Agency resumes. GreenLine will not pay fees to any third party agency or firm that does not have a signed "GreenLine Systems, Inc Agency Fee Agreement".
